

End of unit quiz

1. Create a table in a spreadsheet which shows your height, another student's height and your partner's height. If you can't measure, just guess.
2. Create a bar chart which shows your different heights.
3. Use a spreadsheet to work out the totals of these numbers –
 $23,456 + 45,734 + 67,937 + 78,093$.
4. What happens if you double click on the edge of a cell in the grey area at the top of a spreadsheet?
5. What do these tool bar icons do in a spreadsheet?
